

Texting in the
car? **Yeah, when
it's in park.**

**You can't watch
your phone and
the road at once.**

**Don't let your phone screen fight for
your attention. The best drivers take
responsibility for their lives and the lives
of others — and never text and drive.**

Why your phone can always wait:

**Being
distracted
slows your
reaction
time.**

**You may
drift in your
lane and
miss signals.**

**Passengers
don't feel
safe riding
with you.**

**Fines are
steep, and so
are the risks.**

**Look away for 5
seconds at 45 mph,
and you've gone the
length of a football
field, blind.**

CRASH Free!**
