# The safest move is to make space.

Moving over isn't just a courtesy — it's the law. First responders and emergency workers show up for you. When you see them, give them room. If you can't change lanes, slowing down could save a life.

## How to move over safely:

Move over to a nonadjacent lane.

Watch for lights, hazards, or stopped vehicles.

Give room to anyone working on the roadside.

If you can't, reduce your speed by 20 mph if the speed limit is 50 mph or more.
